

## **PARTNERSHIP POLICY FOR 3D EDUCATORS**

### **Building a Collaborative Future**

At 3D Educators, we recognize that the bridge between education and industry is built through strong alliances. We are committed to fostering meaningful partnerships with academic institutions, corporate entities, and independent consultants worldwide. Our goal is to create a synergy that enhances the professional landscape and provides students with unrivaled opportunities for growth.

### **Our Vision for Collaboration**

We believe that by working together, we can provide better solutions for the global workforce. Whether it is through joint certification programs, corporate training modules, or technology sharing, our partnerships are rooted in mutual respect, transparency, and a shared passion for excellence in education.

### **Types of Partnerships**

We welcome various forms of collaboration including but not limited to Corporate Training Alliances where we provide specialized training to your workforce, Academic Partnerships where we help universities bridge the gap with industrial software training, and Franchise Alliances for those looking to expand the reach of 3D Educators' proven methodology in new regions.

### **Proposal and Evaluation Process**

Potential partners are invited to submit a formal Expression of Interest through our official communication channels. Each proposal is carefully reviewed by our board of directors based on its alignment with our core values, the reputation of the proposing entity, and the long term benefits to the student community. We look for partners who demonstrate high ethical standards and a commitment to quality.

### **Quality Assurance and Standards**

To maintain the prestige of the 3D Educators brand, all partners must adhere to our standardized teaching methodologies and quality control protocols. This ensures that a student receiving training through a partner receives the same high level of expertise as they would at our main campus. We reserve the right to conduct periodic audits of partner facilities and training delivery.

#### **3D EDUCATORS – TRAINERS & CONSULTANTS™**

## Intellectual Property Rights

All training materials, course outlines, brand assets, and proprietary software provided by 3D Educators remain the exclusive property of our institute. Partners are granted a limited license to use these materials solely for the duration and purpose of the agreed collaboration. Unauthorized reproduction or distribution of our intellectual property is strictly prohibited.

## Financial and Revenue Models

Each partnership is unique, and financial arrangements are negotiated on a case by case basis. Our revenue sharing models are designed to be fair and sustainable, ensuring that all parties are motivated to invest their best efforts into the success of the program. All financial transactions must be documented and handled through our official banking portals.

## Confidentiality and Professionalism

Both 3D Educators and our partners agree to keep all sensitive business information, student data, and trade secrets strictly confidential. We believe that trust is the foundation of any successful alliance, and we expect our partners to uphold the highest levels of professional integrity in all dealings.

## Termination of Agreement

While we aim for long lasting relationships, either party may terminate a partnership if the agreed terms are not met or if there is a breach of conduct. In such cases, the priority will always be to ensure that the ongoing education of enrolled students is not disrupted.

## Start a Conversation with Us

We are excited about the possibility of working with you to transform the future of professional education. If you believe your organization shares our vision, we invite you to reach out to our strategic alliances team.
